Zinnov Zones Platform Engineering Ratings 2018

Sunder Sarangan, General Manager - Product Engineering Services & CMO, Persistent Systems

“Software 4.0 represents our thought leadership as a playbook for customers to build software products or software-driven businesses. It emphasizes new and emerging trends in the discovery, design and engineering of industry leading technology products. This strengthens our core capabilities in Product Engineering as we partner with customers to navigate technology shifts in the products and businesses.”

Sidhant Rastogi, Partner & Practice Head, Zinnov

“Persistent has a strong market positioning and is among the leaders when it comes to engineering research and development services for enterprise and consumer software products. The firm's legacy in building software products coupled with the ability to drive digital transformation through their Software 4.0 and platform centric approach has helped make them a preferred partner for the software & internet enterprise community. Persistent has a strong focus on building APIs and off-the-shelf frameworks to reduce time to market for new product development.”
