Persistent Systems and MuleSoft Partner to Accelerate Digital Transformation

Santa Clara, CA – February 9, 2017 – Persistent Systems and MuleSoft today announced a partnership that will help customers speed their Digital Transformation. Utilizing MuleSoft's Anypoint Platform™, Persistent will help organizations rapidly integrate valuable enterprise data locked in silos, to create new revenue channels, improve customer experience, and drive innovation.

Persistent Systems' implementation expertise and industry knowledge will be enhanced with Anypoint Platform™. Persistent will help customers build a network of applications, data and devices through API-led connectivity in the cloud, on-premises, or hybrid. Anypoint Platform™ will further bolster the Persistent Vega™ framework, a reference architecture based on data integration, data curation, and API management, that rapidly brings new experiences to market.

Brent Hayward, Vice President of Global Partners and Services
"With the explosion of disparate technologies today, connecting them all quickly and efficiently is the key to gaining a competitive edge. Through its partnership with MuleSoft, Persistent Systems is enabling its customers to create a dynamic application network to achieve their goals and accelerate their pace of business. We're pleased to welcome Persistent Systems into MuleSoft's partner ecosystem and look forward to working together to deliver significant business impact to our mutual customers."

Sudhir Kulkarni, President, Digital Business, at Persistent Systems
"To quote Maverick from Top Gun, in business today there is a need for speed. Becoming software-driven through Digital Transformation creates speed. Our Vega framework with its emphasis on data, API, and experiences brings speed to digital. Data integration – bringing data from existing silos within an enterprise, cleaning it and making it consumable in the cloud – is critical and this is where MuleSoft, really strengthens Vega."

MuleSoft is the industry leader in data integration and API management. Persistent Digital engages with financial and healthcare verticals. Data integration, increasing data quality, improving the velocity of data capital through the enterprise are key to digital initiatives in the realms we play in. The Vega framework comes premixed with a set of components that are easily leveraged to provide scalable and secure outcomes and experiences for our clients and their customers, at speed. MuleSoft's Anypoint Platform enables Persistent to connect to more data sources faster and more reliably.

About Anypoint Platform
MuleSoft's Anypoint Platform™ is a leading solution for API-led connectivity that creates an application network of applications, data, and devices, both on-premises and in the cloud. This hybrid integration platform includes iPaaS, ESB, and a unified solution for API management, design and publishing.

About Persistent Systems

Persistent Systems (BSE & NSE: PERSISTENT) builds software that drives the business of our customers; serving software product companies and enterprises with software at the core of their digital transformation.
