

Realize tangible benefits from your ML investments with MLOps

AI and ML is unleashing the next wave of digital disruption. While most organizations are actively investing in developing machine learning models, the operational aspects of ML such as constantly changing data, performance, and governance tend to be side-lined. This can often result in delays in realizing tangible business value from ML programs.

Persistent's ML Operationalization service helps you deploy, monitor and govern your models in production and ensures that they stay relevant by rapidly adapting to changing conditions. You can

deploy your models on any cloud, on-premises or hybrid platform that's right for your needs. The solution, customized to your needs, continuously monitors models and delivers production diagnostics to enhance model performance. It helps you comply with regulations through governance policies that you can customize and helps preserve the complete history of model changes and updates. With Persistent's ML Operationalization services, you can deploy models in minutes instead of weeks and see business value rapidly.

Persistent’s ML Operationalization Timelines and Milestones

What you get

Ease of Deployment

Automated deployment on modern production infrastructures like Kubernetes and spark, on cloud or on premise. Bring in CI, CD and CT in context of ML.

Manage Change

Ensure service by monitoring ML models for performance issues with ML specific issues like data drift, models metrics and infra monitoring and alerts. Automated retraining pipelines triggered by monitoring to ensure models stay relevant to business.

Manage Complexity

Ensure models stay relevant to business by allowing for frequent retraining, testing new competitive models and auto deploy most performing ML model.

Managing Risk and Regulations

Enforce governance policies, ensure reproducibility, traceability and explainability for ML models.

Start scaling ML models across your business today.
