

Persistent

Red Hat

Rapidly build and deploy applications that scale intelligently across hybrid cloud

Using Red Hat OpenShift

Red Hat OpenShift is an enterprise Kubernetes container platform, optimized for developer productivity that comes with Red Hat's enterprise grade support.

Red Hat OpenShift Container Platform is the leading enterprise Kubernetes platform, with automated operations for hybrid cloud deployments, optimized for developer productivity. OpenShift is centered on two key technologies: containers and Kubernetes. When combined with Red Hat Ansible, which automates cloud provisioning and service orchestration, Red Hat provides a complete stack for Application Modernization and DevOps Transformation. Only Persistent can provide the right combination of DevOps automation, containerization, cloud platform management, and application skills along with a flexible global delivery footprint.

Offerings and Solutions

Enterprise Cloud Migration

Enabling enterprises take the first step in their cloud journey by rapidly moving their applications and data to the cloud through efficient migration strategies for them to begin realizing savings in IT expenditure.

Enterprise Application Modernization

Modernizing legacy enterprise applications to create new business value by enabling them for cloud and updating them with modern features and capabilities. Helping migrate legacy enterprise applications to the cloud to enable functionalities that better align with the business needs.

Cloud-Native Development

Providing cloud application services to develop new cloud-native applications, or to re-platform/re-factor existing applications for new target clouds, thereby enabling companies to accelerate time to market while saving development costs.

DevOps

Help IT staff automate manually intensive infrastructure and DevOps processes ensuring consistency, lower upgrade downtimes and increased staff productivity.

Why Persistent?

2000+ Containerization and Kubernetes trained employees.	80+ Red Hat Ansible and OpenShift accreditations with objective to reach 100+ by 2021	700+ Containerized open source packages.	20+ Projects containerizing workloads on AWS, Azure, GCP, & IBM Cloud.	25+ Certified operators developed
--	---	--	--	---

Benefits of Red Hat OpenShift

24% higher developer productivity.

>2x more new applications and features.

49% faster development, new apps.

56% faster development, new features.

64% faster deployment compute.

About Persistent

Persistent Systems (BSE & NSE: PERSISTENT) builds software that drives our customers' business; enterprises and software product companies with software at the core of their digital transformation.
