Metadata Driven Ingestion Framework

About Persistent

Persistent Systems (BSE & NSE: PERSISTENT) is a global IT services leader in Digital Engineering and Enterprise Modernization. With 23,900+ employees in 19 countries, it drives AI, cloud, automation, and CX transformation for businesses across industries. A UNGC participant, it's carbon-neutral and India's fastest-growing IT brand in 2024.

What we offer

The Metadata driven Ingestion Framework is an SQL based Metadata Framework which streamlines the process of source integration. It simplifies the integration of various data sources, ensuring data consistency and accuracy while reducing the manual efforts involved. The framework is scalable and adaptable, supporting both simple and complex data integration scenarios.

What our customers are saying:

"We had a big acquisition with Allergan. When that acquisition happened, we were ready. We were able to give so many synergies back to our business, and we were able to seamlessly integrate. And it's all thanks to having a very robust MDM platform by Reltio."

Ramu Amanchi
Manager – Integration and Data Services, Abbvie

Why Reltio?

Unmatched Track Record

140+ deployments across industries with proven ROI. Recognized as a leader in the Forrester Wave 2023 Master Data Management. Our customers improve efficiency and drive growth with trusted, interoperable data.

LLM-driven match and merge

Pretrained, secure ML models for automatic matching and merging. Powered by patent-pending flexible entity resolution networks that incorporate zero-shot learning.

Mobilized, interoperable data delivered in milliseconds.

Our AI-powered data unification and management platform delivers cleansed data in real time to where it's needed—analytical or operational systems alike.

Highly flexible architecture evolves with your business

Extend your solution to any data source or domain, & scale rapidly as your business requirements change.

Enhanced productivity with Reltio Intelligent Assistant (RIA)

Chat-based data exploration, segmentation, & documentation search. Powered by generative AI.

ML-powered match and merge

Tap into the power of ML for 10X productivity improvements and use our industry-specific, ML-powered entity resolution.

Fast time to value accelerates your success

Go live in 90 days with prebuilt velocity packs incorporating market expertise and prescriptive delivery methodology.

Key use cases

Faster Metadata Mapping

Maps and integrates metadata faster from diverse data sources into expected format of reltio, minimizing errors and reducing manual effort.

Enhanced Data Quality

Incorporates data validation and cleansing processes to maintain high data quality and integrity.

Accelerated Data Integration into platform

Streamlines the integration process, reducing the time and resources needed for onboarding new data sources.

Increase Operational Efficiency & reduce TCO

Automates key aspects of data integration, enhancing overall operational efficiency & reducing manual intervention.

About Reltio

Reltio delivers AI-powered data management and unification capabilities that create trusted, interoperable data that is unified, cleansed, and enriched across an ever-expanding number of enterprise silos and sources. Reltio gives enterprises of all sizes unmatched business responsiveness through trusted data where and when needed.
