

Controlled Bulk Merge Capability

What we offer

Controlled Bulk Merge Capability is designed to ease the workload of data stewards by streamlining the merging process, ensuring that only the approved data is merged in bulk. This approach simplifies the task for data stewards, reduces the risk of errors, and ensures a smooth and accurate consolidation of records.

This solution is particularly valuable for enterprises where for specific data scenarios, data stewards need to maintain control over which records are merged, ensuring data integrity and minimizing the risk of errors and under matches.

What our customers are saying

We were able to eliminate our dependency on other teams by deploying Controlled Bulk Merge Capability. Appreciate the team's hard work in coming up with the design and completing the development and testing within a week's timeframe.

Aarthi Sainathan

Senior Manager, Parexel

Why Reltio?

Highly flexible architecture evolves with your business

Extend your solution to any data source or domain, and scale rapidly as your business requirements change.

Fast time to value accelerates your success

Go live in 90 days with prebuilt velocity packs incorporating market expertise and prescriptive delivery methodology.

ML-powered match and merge

Tap into the power of ML for 10X productivity improvements and use our industry-specific, ML-powered entity resolution.

Enhanced productivity with Reltio Intelligent Assistant (RIA)

Chat-based data exploration, segmentation, and documentation search. Powered by Generative AI.

LLM-driven match and merge

Pretrained, secure ML models for automatic matching and merging. Powered by patent-pending Flexible Entity Resolution Networks that incorporate zero-shot learning.

Mobilized, interoperable data delivered in milliseconds

Our AI-powered data unification and management platform delivers cleansed data in real time to where it's needed — analytical or operational systems alike.

Unmatched track record

140+ deployments across industries with proven ROI. Recognized as a leader in the Forrester Wave 2023 Master Data Management. Our customers improve efficiency and drive growth with trusted, interoperable data.

Key use cases

Automated Merging

Simplifies the merging process, allowing data stewards to focus on reviewing and approving records without being bogged down by manual consolidation tasks.

Increased Transparency and Adherence to Standards

A detailed audit trail of all merge operations, maintaining transparency and adherence to data governance policies.

Improved Data Governance

Avoids the risk of negative matches by bypassing automatic match rules and only merging pre-approved records.

Efficient Big Data Management

Capable of handling large volumes of data, making it suitable for organizations with extensive data management needs.

About Reltio

Reltio delivers AI-powered data management and unification capabilities that create trusted, interoperable data that is unified, cleansed, and enriched across an ever-expanding number of enterprise silos and sources. Reltio gives enterprises of all sizes unmatched business responsiveness through trusted data where and when needed.

About Persistent

Persistent Systems (BSE & NSE: PERSISTENT) is a global services and solutions company delivering Digital Engineering and Enterprise Modernization to businesses across industries. With over 23,900 employees located in 19 countries, the Company is committed to innovation and client success. Persistent offers a comprehensive suite of services, including AI-enabled software engineering, product development, data and analytics, CX transformation, cloud computing, and intelligent automation. The Company is part of the MSCI India Index and is included in key indices of the National Stock Exchange of India, including the Nifty Midcap 50, Nifty IT, and Nifty MidCap Liquid 15 as well as several on the BSE such as the S&P BSE 100 and S&P BSE SENSEX Next 50.
