1 Nature of operations

Persistent Systems, Inc. ("the Company") is a wholly owned subsidiary of Persistent Systems Limited ("The holding company"). The Company along with the holding company and its subsidiaries collectively refer to as "The Group". The Company is specializing in software products, services and technology innovation. Also, the Company is engaged in providing sales and marketing support and other allied services to its group entities.

The Company is incorporated and domiciled in United States of America (USA) and has its registered office at 2055, Laurelwood Rd, Suite 210, Santa Clara, CA 95054, USA.

2 Basis of preparation

The condensed interim financial statements of Persistent Systems, Inc. ("the Company") comprise of the following:

- a. Balance Sheet as at December 31, 2025
- b. Statement of Profit and Loss (including other comprehensive income) for the quarter and nine months ended December 31, 2025
- c. Statement of Cash Flow for the nine months then ended
- d. Statement of Changes in Equity for the nine months then ended
- e. Notes forming part of financial statements
- f. Material Accounting Policy information and other explanatory information

The Company's management have prepared accompanying condensed interim financial statements for the quarter and nine months ended December 31, 2025, in accordance with the recognition and measurement principle of Indian Accounting Standard 34, Interim Financial Reporting (Ind AS 34) except for certain presentation and disclosures requirement as required under the Ind AS 34.

The accompanying condensed interim financial statements have been prepared solely to assist the management of Persistent Systems Limited ('the Holding Company') in the preparation of its consolidated financial statements for the quarter and nine months ended December 31, 2025.

Historical cost convention

The financial statements of The Company have been prepared on an accrual basis and under the historical cost convention except for certain financial instruments and contingent consideration in business combination, which have been measured at fair value. Historical cost is generally based on the fair value of consideration given in exchange of goods and services.

3 Material accounting policy information

A Accounting year

The accounting year of the Company is starting from April 1 and ending on March 31.

B Functional currency

The Company's functional currency is the USD. To facilitate consolidation in holding company, these financial statements are presented in INR, which is the presentation currency. The results and balances are translated from functional currency to presentation currency using the following procedure:

- i. All assets and liabilities are translated at the closing rate as at the date of the balance sheet;
- ii. All income and expense items are translated at the average exchange rates for the period/year;
- iii. The equity share capital is translated on the date of transaction;
- iv. The exchange differences arising out of the year end conversion are recognised in Other Comprehensive Income and the said amount is shown under the head "Other Equity".

C Use of estimates and judgements

- a) The preparation of the condensed interim financial statements in conformity with Ind AS requires the Management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. The application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these financial statements have been disclosed appropriately. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

b) Critical accounting estimates and judgements

i. Revenue recognition

The Company's contracts with customers include promises to transfer multiple products and services to a customer. Revenues from customer contracts are considered for recognition and measurement when the contract has been approved by the parties to the contract, the parties to the contract are committed to perform their respective obligations under the contract, and the contract is legally enforceable. The Company assesses the services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligations to determine the deliverables and the ability of the customer to benefit independently from such deliverables, and allocation of transaction price to these distinct performance obligations involves significant judgment.

Revenue from fixed price maintenance type contracts is recognised rateably on a straight-line basis when services are performed through an indefinite number of repetitive acts over a specified period. Revenue from fixed-price maintenance type contract is recognised rateably using a percentage-of-completion method when the pattern of benefits from the services rendered to the customer and The Company's costs to fulfil the contract is not even through the period of the contract because the services are generally discrete in nature and not repetitive. The use of a method to recognise such revenues requires judgment and is based on the promises in the contract and nature of the deliverables.

The Company uses the percentage-of-completion method in accounting for its other fixed-price contracts. Use of the percentage-of-completion method requires the Company to estimate the efforts or costs expended to date as a proportion of the total efforts or costs to be expended. Efforts or costs expended have been used to measure progress towards completion. Provisions for estimated losses, if any, on uncompleted contracts are recorded in the period in which such losses become probable based on the expected contract estimates at the reporting date.

Income from services rendered to the group companies is recognised as and when services are rendered and are invoiced using cost-plus mark-up approach.

Further, the Company uses significant judgement while determining the transaction price allocated to performance obligations using the expected cost plus margin approach.

In respect of the contracts where the transaction price is payable as revenue share at pre-defined percentage of customer revenue and bearing in mind, the time gap between the close of the accounting period and availability of the revenue report from the customer, the Company is required to use its judgement to ascertain the income from revenue share on the basis of historical trends of customer revenue.

The Company receives advance payments from customers for the sale of software products, services and technology innovation including complete product life cycle services after signing the contract and receipt of payment. There is a significant financing component for these contracts considering the length of time between the customers' payment and rendering of services as well as the prevailing interest rate in the market. As such, the transaction price for these contracts is discounted using the interest rate implicit in the contract (i.e., the interest rate that discounts the cash selling price to the amount paid in advance). This rate is commensurate with the rate that would be reflected in a separate financing transaction between the Company and the customer at contract inception.

The Company applies the practical expedient for short-term advances received from customers. That is, the promised amount of consideration is not adjusted for the effects of a significant financing component if the period between the transfer of the promised services and the payment is one year or less.

ii. Income taxes

The Company's primary tax jurisdiction is United States of America. Significant judgements are involved in determining the provision for income taxes including judgements whether the tax positions are probably of being sustained in tax assessments.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits are available against which deductible temporary differences & tax losses can be utilised. Management evaluates if the deferred tax assets will be realised in future considering the historical taxable income, scheduled reversals of deferred tax liabilities, projected future taxable income and tax-planning strategies. While the Management believes that the Company will realise the deferred tax assets, the amount of deferred tax asset realisable, could be reduced in the near term if estimates of future taxable income during the carry forward period are reduced.

iii. Business combination

Business combinations are accounted for using Ind AS 103, Business Combinations, which requires the acquirer to recognise the identifiable assets and contingent consideration at fair value. Estimates are required to be made in determining the value of contingent consideration and intangible assets. These valuations are conducted by external valuation experts. These measurements are based on information available at the acquisition date and are based on expectations and assumptions that have been deemed reasonable by the Management.

iv. Property, plant and equipment

The useful lives and residual values of Company's assets are determined by management at the time the asset is acquired and reviewed periodically. The lives are based on historical experience with similar assets as well as anticipation of future events, which may impact their life, such as changes in technology. The charge in respect of depreciation is derived after determining an estimate of an asset's expected useful life and the expected residual value at the end of its life.

v. Leases

Ind AS 116 requires lessees to determine the lease term as the non-cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain. The Company makes an assessment on the expected lease term on a lease-by-lease basis and thereby assesses whether it is reasonably certain that any options to extend or terminate the contract will be exercised. In evaluating the lease term, the Company considers factors such as any significant leasehold improvements undertaken over the lease term, costs relating to the termination of the lease and the importance of the underlying asset to the Company's operations taking into account the location of the underlying asset and the availability of suitable alternatives. The lease term in future periods is reassessed to ensure that the lease term reflects the current economic circumstances. After considering current and future economic conditions, the Company has concluded that no changes are required to lease periods relating to the existing lease contracts.

The Company enters into leases with third-party landlords and as a consequence the rate implicit in the relevant lease is not readily determinable. Therefore, the Company uses its incremental borrowing rate as the discount rate for determining its lease liabilities at the lease commencement date. The incremental borrowing rate is the rate of interest that the Company would have to pay to borrow over similar terms which requires estimations when no observable rates are available.

vi. Provision and contingent liabilities

The Company estimates the provisions that have present obligations as a result of past events and it is probable that outflow of resources will be required to settle the obligations. Provisions are determined based on the best estimate of the amount required to settle the obligation at the reporting date. If the effect of time value of money is material, provisions are discounted using a current pre-tax rate that reflects the risks specific to the liability. These estimates are reviewed at each balance sheet date and adjusted to reflect the current best estimates. The Company uses significant judgements to assess contingent liabilities.

vii. Compensated absences

The cost of the compensated absences and the present value of the same are based on actuarial valuation using the projected unit credit method. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, Compensated absences are highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

viii. Share based payments

The share based compensation expense is determined based on the Company's estimate of equity instruments of the holding company that will eventually vest. The corresponding equivalent credit will be accounted as 'Payables' to the holding company. The share based compensation expense is determined based on recharge agreement from the holding company.

ix. Impairment of assets

Investments in subsidiaries, goodwill and intangible assets are tested for impairment as per applicable requirements under Ind AS and when events occur or changes in circumstances indicate that the recoverable amount of the asset or cash generating units to which these pertain is less than its carrying value. The recoverable amount of cash generating units is higher of value-in-use and fair value less cost to dispose. The calculation of value in use of a cash generating unit involves use of significant estimates and assumptions which includes turnover and earnings multiples, growth rates and net margins used to calculate projected future cash flows, risk adjusted discount rate, future economic and market conditions.

D Current versus non-current classification

All assets and liabilities have been classified as current or non-current as per the Company's operating cycle and other criteria set out in the Indian Accounting Standards ('Ind AS') issued by the Institute of Chartered Accountants of India (ICAI). Operating cycle is the time between the acquisition of resources / assets for processing their realisation in cash and cash equivalents and based on the nature of products / services and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months.

E Property, plant and equipment

Property, plant and equipment are stated at cost, less accumulated depreciation and accumulated impairment losses, if any. Capital work-in-progress includes cost of Property, plant and equipment that are not ready to be put to use and is stated at cost. The cost comprises the purchase price and directly attributable costs of bringing the asset to its working condition for its intended use, cost of replacing part of the property, plant and equipment, cost of asset retirement obligations and borrowing costs for long term construction projects if the recognition criteria are met. Any trade discounts and rebates are deducted in arriving at the purchase price.

Subsequent expenditure related to an item of Property, plant and equipment is added to its original cost only if it is probable that future economic benefits associated with the item will flow to the Company. All other expenses on existing Property, plant and equipment, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss for the period during which such expenses are incurred.

Gains or losses arising from disposal of Property, plant and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss when the asset is disposed.

F Intangible assets

Intangible assets including software licenses of enduring nature and contractual rights acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortisation which is recognised from the date they are available for use and accumulated impairment losses, if any. Cost comprises the purchase price and directly attributable costs of preparing the asset for its intended use. Internally generated intangible assets, excluding capitalised development costs are reflected as expenditure in the statement of profit and loss in the reporting year in which these are incurred.

Gains or losses arising from disposal of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss when the asset is derecognised.

Research and development cost

Research costs are expensed as incurred. Development expenditure incurred on an individual project is recognised as an intangible asset when the Company can demonstrate:

- technical feasibility of completing the intangible asset so that it will be available for use or sale;
- its intention to complete the asset and use or sell it;
- its ability to use or sell the asset;
- how the asset will generate probable future economic benefits;
- the availability of adequate resources to complete the development and to use or sell the asset; and
- the ability to measure reliably the expenditure attributable to the intangible asset during development.

Such development expenditure, until capitalization, is reflected as intangible assets under development.

Following the initial recognition, internally generated intangible assets are carried at cost less accumulated amortisation and accumulated impairment losses, if any. Amortisation of internally generated intangible asset begins when the development is complete and the asset is available for use.

G Business combinations

The acquisition method of accounting is used to recognise for all business combinations when the acquired set of activities and assets meet the definition of business and control is transferred, regardless of whether equity instruments or other assets are acquired. The acquisition cost is measured as the aggregate of the consideration transferred and the amount of any non-controlling interest in the acquiree.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. The Company recognises any non-controlling interest in the acquired entity on an acquisition-by-acquisition basis either at fair value or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets.

Acquisition-related costs are expensed as incurred. The excess of the:

- Consideration transferred;
- Amount of any non-controlling interest in the acquired business, and
- Acquisition-date fair value of any previous equity interest in the acquired business

over the fair value of the net identifiable assets acquired is recognised as goodwill. If those amounts are less than the fair value of the net identifiable assets of the business acquired, the difference is recognised in other comprehensive income and accumulated in equity as capital reserve provided there is clear evidence of the underlying reasons for classifying the business combination as a bargain purchase. In other cases, the bargain purchase is recognised directly in equity as capital reserve.□

Business combinations between entities under common control is accounted for using pooling of interest method. The identity of the reserves is preserved as they appear in the standalone financial statements of the Company in the same form in which they appeared in the financial statements of the acquired entity. The difference, if any, between the consideration and the amount of share capital of the acquired entity is transferred to business transfer reserve.

H Goodwill / Gain on bargain purchase

Goodwill represents the cost of business acquisition in excess of the Company's interest in the net fair value of identifiable assets, liabilities and contingent liabilities of the acquiree. When the net fair value of the identifiable assets, liabilities and contingent liabilities acquired exceeds the cost of business acquisition, a gain is recognised in the capital reserves as gain on bargain purchase.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Company reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted through goodwill during the measurement period, or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognized at that date. These adjustments are called as measurement period adjustments. The measurement period does not exceed one year from the acquisition date.

I Depreciation and amortisation

Depreciation on Property, plant and equipment is provided from the date the asset is made available for use using the Straight Line Method ('SLM') over the useful lives of the assets.

The management estimates the useful lives for the Property, plant and equipment except for leasehold improvements as follows:

| Assets | Useful lives |
|-----------------------------------|--------------|
| Computers* | 3 to 5 years |
| Computers - Servers and networks* | 3 to 5 years |
| Office equipment | 5 years |
| Furniture and fixtures | 5 years |

*For these classes of assets, based on a technical evaluation, the Management believes that the useful lives as given above best represent the period over which the Management expects to use these assets. Thus useful lives of these assets are different from useful lives as prescribed under Part C of Schedule II of the Indian Companies Act 2013.

Leasehold improvements are amortized over the period of lease or useful life, whichever is lower.

Where cost of a part of the asset ("asset component") is significant to total cost of the asset and useful life of that part is different from the useful life of the remaining asset, useful life of that significant part is determined separately and such asset component is depreciated over its separate useful life.

Intangible assets are amortized on a straight-line basis over their estimated useful lives ranging from 3 to 7 years from the day the asset is made available for use.

Depreciation & amortisation methods, useful lives and residual values are reviewed periodically.

J Borrowing costs

Borrowing cost includes interest, amortisation of ancillary costs incurred in connection with the arrangements of borrowings. Borrowing costs directly attributable to the acquisition, construction or development of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as a part of the cost of the respective asset. All other borrowing costs are expensed in the year in which they occur.

K Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Initial recognition and measurement

The Company recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument. All financial assets and liabilities are recognised at fair value on initial recognition, except for trade receivables which are initially measured at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, which are not at fair value through profit or loss, are added to the fair value on initial recognition.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. The Company's business model refers to how it manages its financial assets to generate cash flows. The business model determines whether the cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

The Company offsets a financial asset and a financial liability when it currently has a legally enforceable right to set off the recognised amounts and the company intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Non-derivative financial instruments**Subsequent measurement****Financial assets****Financial assets at amortized cost**

Financial assets that are held within a business model whose objective is to hold assets for collecting contractual cash flows and whose contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding are subsequently measured at amortized cost using the effective interest rate method. The change in measurements are recognised as finance income in the statement of profit and loss.

Financial assets at fair value through other comprehensive income (FVTOCI)

Financial assets that are held within a business model whose objective is achieved both by collecting contractual cash flows and selling the financial assets and the assets' contractual cash flows represent solely payments of principal and interest on the principal amount outstanding are subsequently measured at fair value. Fair value movements are recognised in other comprehensive income.

Financial assets at fair value through profit or loss (FVTPL)

Any financial asset which does not meet the criteria for categorization as financial asset at amortized cost or at FVTOCI, is classified as financial asset at FVTPL. Financial assets except derivative contracts included within the FVTPL category are subsequently measured at fair value with all changes recognised in the statement of profit and loss.

Investments in subsidiaries

Equity investment in subsidiaries are carried at cost less impairment.

Cash and cash equivalents

Cash and cash equivalents in the balance sheet comprise cash at bank and in hand, bank deposits and short-term deposits with an original maturity of three months or less.

Financial liabilities

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognised in a business combination which is subsequently measured at fair value through profit or loss. For trade and other payables maturing within one year from the Balance Sheet date, the carrying amounts approximately.

Derecognition

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognised from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expired. On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity, if any, is recognised in profit or loss, except in case of equity instruments classified as FVOCI, where such cumulative gain or loss is not recycled to statement of profit and loss.

The Company derecognises financial liabilities when the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in statement of profit or loss.

Fair value of financial instruments

In determining the fair value of its financial instruments, the Company uses a variety of methods and assumptions that are based on market conditions and risks existing at each reporting date. The methods used to determine fair value include discounted cash flow analysis, available quoted market prices, dealer quotes.

For equity instruments of unlisted companies, in limited circumstances, insufficient more recent information is available to measure fair value, or if there are a wide range of possible fair value measurements and cost represents the best estimate of fair value within that range. The Company recognises such equity instruments at cost, which is considered as appropriate estimate of fair value.

All methods of assessing fair value result in general approximation of value, and such value may never actually be realised. For financial assets and liabilities maturing within one year from the Balance Sheet date and which are not carried at fair value, the carrying amounts approximate fair value due to the short maturity of these instruments.

Impairment of financial assets

The Company applies Expected Credit Loss (ECL) model for measurement and recognition of impairment loss on financial assets measured at amortized cost and financial assets that are debts instruments and are measured at fair value through other comprehensive income (FVTOCI). ECL is the difference between contractual cash flows that are due and the cash flows that the Company expects to receive, discounted at the original effective interest rate.

For trade receivables, the Company recognizes impairment loss allowance based on lifetime ECL at each reporting date, right from its initial recognition. For other financial assets, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12 month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used.

L Revenue recognition

Revenues from customer contracts are considered for recognition and measurement when the contract has been approved by the parties to the contract, the parties to the contract are committed to perform their respective obligations under the contract, and the contract is legally enforceable. Revenue is recognised upon transfer of control of promised products or services ("performance obligations") to customers in an amount that reflects the consideration the Company has received or expects to receive in exchange for these products or services ("transaction price"). When there is uncertainty as to collectability, revenue recognition is postponed until such uncertainty is resolved.

The Company assesses the services promised in a contract and identifies distinct performance obligations in the contract. the Company allocates the transaction price to each distinct performance obligation based on the relative standalone selling price. The price that is regularly charged for an item when sold separately is the best evidence of its standalone selling price. In the absence of such evidence, the primary method used to estimate standalone selling price is the expected cost plus a margin, under which the Company estimates the cost of satisfying the performance obligation and then adds an appropriate margin based on similar services.

The Company's contracts may include variable consideration including rebates, volume discounts and penalties. the Company includes variable consideration as part of transaction price when there is a basis to reasonably estimate the amount of the variable consideration and when it is probable that a significant reversal of cumulative revenue recognised will not occur when the uncertainty associated with the variable consideration is resolved.

i. Income from software services and licenses

The Company derives revenues primarily from IT services comprising of software development and related services and from the licensing of software products.

Arrangements with customers for software related services are either on a time-and-material or a fixed-price basis.

Revenue on time-and-material contracts are recognised as and when the related services are rendered. Revenue from fixed-price contracts, where the performance obligations are satisfied over time and where there is no uncertainty as to measurement or collectability of consideration, is recognised as per the percentage-of-completion method. When there is uncertainty as to measurement or ultimate collectability, revenue recognition is postponed until such uncertainty is resolved.

Revenue from licenses where the customer obtains a "right to use" the licenses is recognised at the time the license is made available to the customer. Revenue from licenses where the customer obtains a "right to access" is recognised over the access period.

When support services are provided in conjunction with the licensing arrangement and the license and the support services have been identified as two separate performance obligations, the transaction price for such contracts are allocated to each performance obligation of the contract based on their relative standalone selling prices. Maintenance revenue is recognised proportionately over the period in which the services are rendered.

Income from services rendered to the group companies is recognised as and when services are rendered and are invoiced using cost-plus mark-up approach.

Unbilled revenue represents revenue recognised in relation to work done until the balance sheet date for which billing has not taken place. For unbilled receivables, there is unconditional right to receive cash and only passage of time is required as per contractual terms.

Unearned revenue (Contract liability) represents the billing in respect of contracts for which the revenue is not recognised.

The Company collects Local Taxes on behalf of the government and, therefore, these are not economic benefits flowing to the Company. Hence, they are excluded from revenue.

ii. Interest

Income from interest is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable. Interest income is included under the head "Other income" in the statement of profit and loss.

iii. Dividends

Dividend income is recognised when the Company's right to receive dividend is established. Dividend income is included under the head 'Other income' in the statement of profit and loss.

M Contract balances**Contract assets**

Contract assets are recognised when there are excess of revenues earned over billings on contracts. Contract assets are classified as unbilled receivables (only act of invoicing is pending) when there is unconditional right to receive cash, and only passage of time is required, as per contractual terms.

Contract liabilities

Unearned and deferred revenue ("contract liability") is recognised when there are billings in excess of revenues.

N Foreign currency transactions and balances

i. Initial recognition

Foreign currency transactions are recorded in the functional currency by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

The Company's functional currency is the USD. To facilitate consolidation in holding company, these financial statements are presented in INR, which is the presentation currency. The results and balances are translated from functional currency to presentation currency using the following procedure:

- i. All assets and liabilities are translated at the closing rate as at the date of the balance sheet;
- ii. All income and expense items are translated at the average exchange rates for the period/year;
- iii. The equity share capital is translated on the date of transaction;
- iv. The exchange differences arising out of the period end conversion are recognised in Other Comprehensive Income and the said amount is shown under the head "Other Equity".

ii. Conversion

Foreign currency monetary items are converted using the exchange rate prevailing at the reporting date. Non-monetary items, which are measured in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction. Non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rates at the date when the values were determined. For foreign currency transactions recognised in profit and loss statement the Company uses average rate if the average approximates the actual rate at the date of the transaction.

iii. Settlement

Revenue, expenses denominated in foreign currencies are translated using the exchange rate in effect on the date of the transaction. Transaction gains or losses realised upon settlement of foreign currency transactions are included in determining net profit or loss for the year in which the transaction is settled.

O Retirement and other employee benefits

Compensated absences

The expected cost of accumulating leave encashment is determined by actuarial valuation performed by an independent actuary at each Balance Sheet date using projected unit credit method on the additional amount expected to be paid / availed as a result of the unused entitlement that has accumulated at the Balance Sheet date. Expense on non-accumulating leave encashment is recognised in the period in which the absences occur.

Other employee benefits

Other short-term employee benefits such as overseas social security contributions and performance incentives expected to be paid in exchange for services rendered by employees, are recognised in the statement of profit and loss during the period when the employee renders the service.

P Income taxes

Tax expense comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the tax laws prevailing in United States. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognised directly in equity is recognised in equity and not in statement of profit and loss.

Deferred income taxes reflect the impact of temporary differences between tax base of assets and liabilities and their carrying amounts. Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except deferred tax liability arising from initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, affects neither accounting nor taxable profit/ loss at the time of transaction. Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses, except deferred tax assets arising from initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, affects neither accounting nor taxable profit/ loss at the time of transaction. Deferred tax assets are recognised only to the extent that sufficient future taxable income will be available against which such deferred tax assets can be realised.

The carrying amount of deferred tax asset is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available against which such deferred tax assets can be realised.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the same taxable group and the taxation authority.

Deferred tax relating to items recognised outside the statement of profit and loss is recognised in co-relation to the underlying transaction either in other comprehensive income or directly in equity.

Q Leases

The Company assesses at the inception of contract whether a contract is or contains a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- i. The contract involves the use of an identified asset;
- ii. The Company has substantially all of the economic benefits from use of the asset through the period of the lease; and
- iii. The Company has the right to direct the use of the asset

Where the Company is a lessee

The Company recognises right-of-use asset representing its right to use the underlying asset for the lease term at the lease commencement date. The cost of the right-of-use asset measured at inception shall comprise of the amount of the initial measurement of the lease liability adjusted for any lease payments made at or before the commencement date less any lease incentives received, plus any initial direct costs incurred and an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset or restoring the underlying asset or site on which it is located.

The right-of-use assets is subsequently measured at cost less any accumulated depreciation, accumulated impairment losses, if any and adjusted for any remeasurement of the lease liability. The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset. The estimated useful lives of right-of use assets are determined on the same basis as those of property, plant and equipment.

Right-of-use assets are tested for impairment whenever there is any indication that their carrying amounts may not be recoverable. Impairment loss, if any, is recognised in the statement of profit and loss.

The Company measures the lease liability at the present value of the lease payments that are not paid at the commencement date of the lease. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses incremental borrowing rate.

The lease payments shall include fixed payments, variable lease payments based on an index or rate, residual value guarantees, exercise price of a purchase option where the Company is reasonably certain to exercise that option and payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

The lease liability is subsequently remeasured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments made and remeasuring the carrying amount to reflect any reassessment or lease modifications or to reflect revised in-substance fixed lease payments.

When the lease liability is remeasured, the corresponding adjustment is reflected in the right-of-use asset, or statement of profit and loss if the right-of-use asset is already reduced to zero.

The Company has elected not to apply the requirements of Ind AS 116 to short-term leases of all assets that have a lease term of 12 months or less and leases for which the underlying asset is of low value. The lease expenses associated with these leases are recognised in the statement of profit and loss on a straight line basis.

Company as a lessor

At the inception of the lease, the Company classifies each of its leases as either an operating lease or a finance lease. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases. the Company recognises lease payments received under operating leases as income over the lease term on a straight line basis.

R Impairment of Non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or Company's of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on budgets and forecast calculations prepared for each CGUs to which the individual assets are allocated. To estimate cash flow projections covered by the most recent budgets / forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the services, industries, or country or countries in which the Company operates, or for the market in which the asset is used.

Impairment losses of continuing operations are recognised in the statement of profit and loss, except for assets previously revalued with the revaluation surplus taken to OCI. For such assets, the impairment is recognised in OCI up to the amount of any previous revaluation surplus.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Goodwill is tested for impairment annually as at reporting date and when circumstances indicate that the carrying value may be impaired.

Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or Company of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods. Intangible assets with indefinite useful lives are tested for impairment annually as at reporting date at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

S Earnings per share (EPS)

Basic earnings per share are calculated by dividing the net profit for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the reporting period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares), if any occurred during the reporting period, that have changed the number of equity shares outstanding, without a corresponding change in resources.

T Provisions

A provision is recognised when the Company has a present obligation as a result of past event; it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are determined based on the best estimate of the amount required to settle the obligation at the reporting date. If the effect of time value of money is material, provisions are discounted using a current pre-tax rate that reflects the risks specific to the liability. These estimates are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

U Contingent liabilities and Commitments

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. Contingent assets are neither recognised nor disclosed in financial statements.

The Company does not recognize a contingent liability but discloses its existence in the financial statements.

V Share based payments

Employees of the Company receive remuneration in the form of share based payment transactions, whereby employees render services as consideration for equity instruments of the holding company (equity-settled transactions).

The cost of equity-settled transactions is determined by the fair value of the options at the date of the grant and recognised as employee compensation cost over the vesting period. The cumulative expense recognised for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Company's best estimate of the number of equity instruments that will ultimately vest.

At the end of each reporting period, the entity revises its estimates of the number of options that are expected to vest best on the non-market vesting and service conditions. It recognises the impact of the revisions to the original estimates, if any, in profit or loss with a corresponding adjustment to payable to the holding company.

The expense or credit recognised in the statement of profit and loss for the period represents the movement in cumulative expense recognised as at the beginning and end of that period and is recognised in employee benefits expense with a corresponding amount recognised as liability payable to the holding company. In case of the employee stock option schemes having a graded vesting schedule, each vesting tranche having different vesting period has been considered as a separate option grant and accounted for accordingly.

Where the terms of an equity-settled transaction award are modified, the minimum expense recognised is the expense as if the terms had not been modified, if the original terms of the award are met. An additional expense is recognised for any modification that increases the total fair value of the share-based payment transaction or is otherwise beneficial to the employee as measured at the date of modification.

W Equity

Ordinary shares are classified as equity share capital. Incremental costs directly attributable to the issuance of new ordinary shares, share options and buyback are recognised as a deduction from equity, net of any tax effects.

X Dividend

Final dividend on shares is recorded as a liability on the date of approval by the shareholders and interim dividends are recorded as a liability on the date of declaration by the Company's Board of Directors.

29. Financial assets and liabilities

The carrying values and fair values of financial instruments by categories are as follows:

| Financial assets/ financial liabilities | As at December 31, 2025 | | | As at December 31, 2024 | | | As at March 31, 2025 | | | Fair value hierarchy |
|---|-------------------------|------------------|-----------------|-------------------------|------------------|-----------------|----------------------|------------------|-----------------|----------------------|
| | FVTPL | Amortised Cost | Cost | FVTPL | Amortised Cost | Cost | FVTPL | Amortised Cost | Cost | |
| Financial assets: | | | | | | | | | | |
| Investments in subsidiaries | - | - | 7,734.43 | - | - | 6,915.83 | - | - | 6,870.78 | Level 3 |
| Investments in common stocks / preferred stocks | 387.19 | - | - | 368.84 | - | - | 368.23 | - | - | |
| Loans | - | 1,215.41 | - | - | 1,322.82 | - | - | 1,293.24 | - | |
| Cash and cash equivalents | - | 1,622.96 | - | - | 554.10 | - | - | 1,221.89 | - | |
| Trade receivables | - | 7,265.64 | - | - | 18,316.45 | - | - | 7,904.52 | - | |
| Unbilled revenue | - | - | - | - | 24.38 | - | - | 6.29 | - | |
| Other non-current financial assets | - | 23.05 | - | - | 20.87 | - | - | 20.84 | - | |
| Other current financial assets | - | 1,066.89 | - | - | 510.15 | - | - | 186.60 | - | |
| Total financial assets | 387.19 | 11,193.95 | 7,734.43 | 368.84 | 20,748.77 | 6,915.83 | 368.23 | 10,633.38 | 6,870.78 | |
| Financial liabilities: | | | | | | | | | | |
| Borrowings | - | 751.44 | - | - | 1,783.54 | - | - | - | - | Level 3 |
| Trade payables | - | 1,576.33 | - | - | 6,806.88 | - | - | 5,371.98 | - | |
| Lease liabilities | - | 355.61 | - | - | 383.75 | - | - | 348.76 | - | |
| Liability towards contingent consideration | 504.37 | - | - | 2,141.91 | - | - | 1,871.94 | - | - | |
| Other current financial liabilities | - | 10,253.46 | - | - | 15,856.92 | - | - | 7,650.80 | - | |
| Total financial liabilities | 504.37 | 12,936.84 | - | 2,141.91 | 24,831.09 | - | 1,871.94 | 13,371.54 | - | |

Fair value hierarchy:

The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists of the following three levels:

Level 1 — Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 — Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 — Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data. In respect of equity instruments of unlisted companies, in limited circumstances, insufficient more recent information is available to measure fair value, or if there are a wide range of possible fair value measurements and cost represents the best estimate of fair value within that range. The Company recognises such equity instruments at cost, which is considered as appropriate estimate of fair value.

Notes forming part of condensed interim financial statements

31. Contingent Liability and Capital Commitments

a. Claims against the Company not acknowledged as debt:

| | As at December 31, 2025 | As at December 31, 2024 | As at March 31, 2025 | (In ₹ Million) |
|---|----------------------------|----------------------------|-------------------------|----------------|
| Direct tax matter: | | | | |
| The Company has received final determination notice dated December 11, 2025 with respect to demand of USD 124,740 related to interest payment on account of under payment of advance tax for FY 2021-22. However, the Company was not required to pay advance tax in FY 2021-22 due to sufficient previous year overpayment credit. Therefore, there can be no levy of interest. Hence, the demand is not valid. The Company is in the process of filing appeal with appropriate appeal authority in the US for abatement of interest and cancellation of demand. | 11.21 | Nil | Nil | |

b. The estimated amount of contracts remaining to be executed on Capital account and not provided for, net of advances is ₹ Nil (Corresponding period/Previous year - Nil).

c. The Company does not have any capital commitments as at December 31, 2025 (Corresponding period/Previous year - Nil).

32. The Company has dissolved Software Corporation International, a wholly owned subsidiary of the Company, on June 27, 2024. This resulted in a loss in the Statement of Profit and Loss on account of write down of the investments amounting to ₹ 2,781.65 Million. This has been presented as an Exceptional Item for the comparative periods presented for the nine months ended December 31, 2024 and year ended March 31, 2025.

33. On 29th December 2025, the Company sold 100% equity shares of Aepona Group Limited to Persistent Systems Limited for a total consideration of 13,879,670 EUR. As a result, the provision for diminution in the value of investment amounting to ₹ 201.79 Million has been reversed and a gain of ₹ 1,256.71 Million has been recognised in other income as Net profit on sale of financial assets designated as amortised cost.

34. On 24th December 2025, the Company has entered into a Share Purchase Agreement with Persistent Systems Germany GmbH for purchase of shares of Persistent Systems Costa Rica Limitada. The purchase price amounts to 4,801,547.11 EUR for 4 ordinary shares of 10000 CRC each.

35. During the nine months and corresponding period ended, the Company has remeasured the contingent consideration payable towards acquisition of business to the erstwhile shareholders of Starfish Associates, LLC, MediaAgility Inc., Data Glove Incorporated and Software Corporation International & SCI Fusion 360, LLC amounting to ₹ 129.75 Million (Corresponding period: ₹ 1,249.29 Million/Previous year: ₹ 1,461.82 Million) based on a settlement agreement and expected payout assessed by management.

36. Transfer pricing

The Company's management has developed a system of maintenance of information and documents as required by the applicable Transfer Pricing Legislation. The Company's management is of the opinion that its international transactions are at arm's length so the aforesaid legislation will not have an impact on the statement of accounts, particularly on the amount of tax expense and that of provision for tax.

37. Segment information

The holding company publishes the condensed standalone interim financial statements of the Company along with the condensed consolidated interim financial statements. In accordance with Ind AS 108 - Operating Segments, the holding company has disclosed the segment information in the condensed consolidated interim financial statements.

38. Corresponding period's/Previous year's comparatives

During the period ended December 31, 2025, the Company has re-classified the following comparatives which are primarily to conform to the current period's classification. This reclassification do not have material impact on the condensed interim financial statements and has been done for the better presentation and to enhance the understanding of the users of the Financial Statements.
