

A. Embedded RAI Offerings

'RAI-Layering' of the Digital Ecosystem*

- Translating organizational policies and regulatory requirements to AI solution-specific controls
- Embedding and configuring RAI controls into AI solutions

Functional Trust Integration

Incorporating functional and domain-specific RAI controls into AI solutions

Note: Foundational Trust is addressed across all pillars. Functional Trust is very specific to the industry vertical which needs a combination of vertical domain subject matter expertise as well as AI risks

B. Program-Level RAI Offerings

Advisory & Operations Support

- Assessment, design and Roll out of RAI programs
- Audits and testing

Enabling Technology Solutions

- Third party tools via strategic partnerships
- Custom-built solutions / accelerators
