

OFFERING 02 / 06

IGA Modernization & Migration

Move from legacy or home-grown identity governance — or from IdentityIQ to the cloud — without disrupting audits.

THE CHALLENGE

Many enterprises run ageing identity governance tools or heavily customized IdentityIQ instances. Upgrades slip, custom code piles up, certification campaigns are manual and late, and the platform cannot govern the cloud, SaaS and AI identities the business now depends on.

YOU NEED THIS IF

- › The current IGA tool is end-of-support, costly to run or hard to upgrade
- › Certification campaigns are manual, late or generate audit findings
- › A move to SaaS-delivered identity governance is on the roadmap

THE JOINT SOLUTION

Persistent assesses the current estate, designs a clean target identity model and migrates roles, policies, entitlements and certification campaigns to SailPoint Human Fabric — or to IdentityIQ 9.0 where governance must stay on-premises. Parallel running and staged cutover keep audits intact throughout.

SailPoint brings

- SailPoint Human Fabric (evolution of Identity Security Cloud)
- SailPoint IdentityIQ 9.0 for on-premises and hybrid estates
- Next-generation certifications and request-time separation-of-duties checks
- SailPoint Atlas connectivity and workflows

Persistent brings

- Current-state assessment and customization analysis
- Target role, policy and entitlement model design
- Migration accelerators and data cleansing
- Parallel run, cutover and hypercare
- Change management and business-user adoption

HOW IT WORKS

1 Assess

Baseline the current platform, customizations, connectors and audit posture.

2 Design

Define the target identity model, roles and migration waves.

3 Migrate

Move policies, roles and campaigns in waves, running in parallel.

4 Optimize

Retire the legacy tool and tune for adoption and performance.

BUSINESS OUTCOMES

- ✓ A supported, upgradable identity governance platform
- ✓ Lower run cost and less custom code
- ✓ Faster, risk-based certification campaigns
- ✓ Audit continuity through the transition

IDEAL FOR

Organizations on legacy or home-grown IGA tools

IdentityIQ customers planning a cloud move or a 9.0 upgrade

Enterprises consolidating identity tools after M&A
